CallCabinet Interface

- 1 **Agent image**
 - Displays the image of an agent associated with a specific extension
- 2 **Agent information**
 - Details the name, extension and email address of the person on the call
- 3 **Detailed call information**
 - Displays call-specific information, such as caller-ID date, time and call duration
- 4 **Flag a call**
 - Allows an authorized user to flag a call for quality control or review by a supervisor
- 5 **Call history and audit log**
 - Secure log of every event pertinent to a call. For example, when a call was accessed, and by whom whether permission to access the call was approved or denied and whether a call was transmitted to another entity
- 6 **E-mail**
 - Allows users to email a copy of the call to single or multiple email addresses
- 7 **Share**
 - Allows an encrypted call to be emailed to multiple recipients without the need to download, zip or move to a 'Drop' box. Include Notes, screen shots and make the call downloadable with time-to-view restrictions
- 8 **Oscillogram**
 - Visual representation of all sound being recorded
- 9 **Note display**
 - Displays notes created on the call over time
- 10 **Time-specific notes**
 - Shows notes created at a specific point in time during the call
- 11 **Notes over time**
 - Shows notes created over a period of time within a call
- 12 **Screenshots over time**
 - Displays the points in time during a call that desktop screenshots were taken
- 13 **Download**
 - A decrypted copy of the call can be downloaded to a computer in WAV format
- 14 **Call transfer information**
 - Visual representation of all extensions that participated in the call
- 15 **Desktop screenshot**
 - Displays screenshots of all desktop activity occurring during a call
- 16 **Quality control**
 - Allows a supervisor to perform customized quality control questionnaires from within the visual call representation. There is no need to access external systems and screens

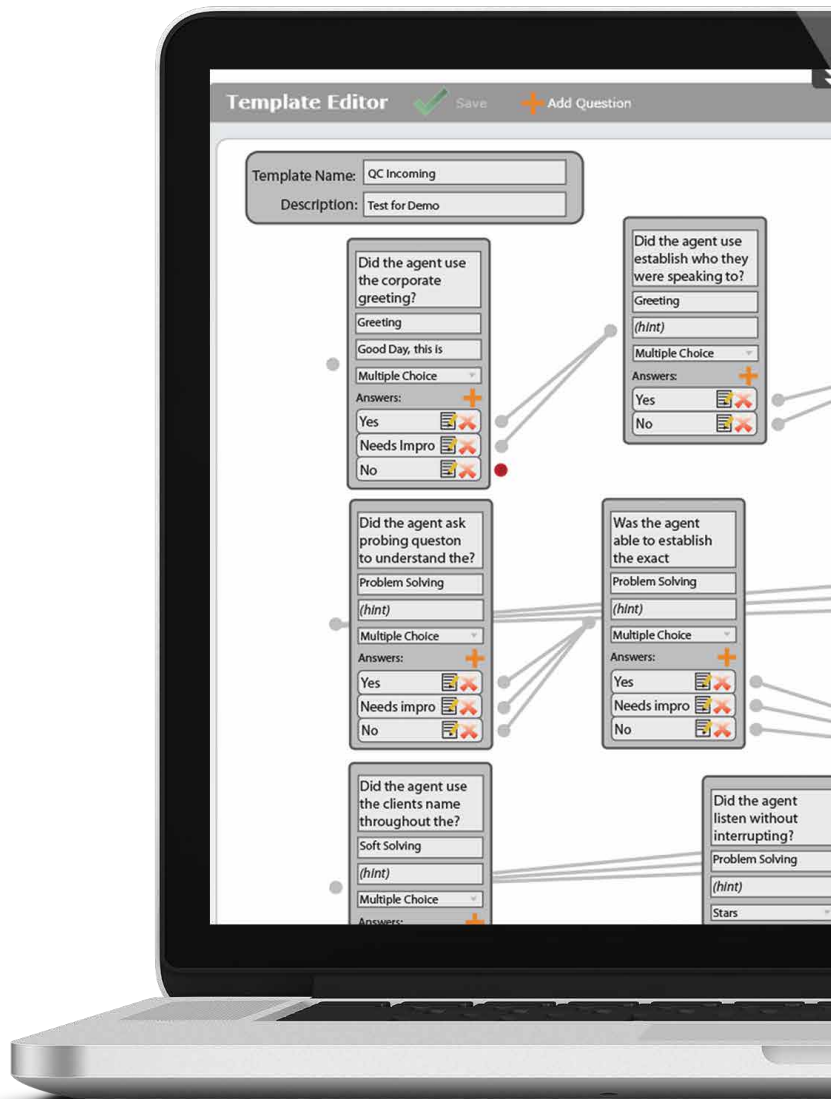

CallCabinet Quality Control

CallCabinet Quality Control offers QA specialists an opportunity to use a state-of-the-art QA system. Templates include a decision tree-based format which allows for dependancies between questions and sections. Answer options include "not applicable", "total quality score fail", "section fail", "star based scoring", "multiple answers per question" and "sliding bars". Personalised templates can be written directly into CallCabinet or imported from a spreadsheet.

The Reporting Feature in Carbon

The reporting feature in Carbon, provides users with multiple reporting options, for example, comparing agents scores, over weeks or months; comparing the scoring between team leaders and the QA specialists; and comparing scores of various teams and groups.

KEY FEATURES

- Web-based interface - user friendly and intuitive
- Widget home page showing number of calls daily, weekly and monthly
- Rapid interface load time
- End-to-end encryption
- Granular security profiles
- Audit trail monitoring
- Multiple call search criteria
- Advanced remote link support for multiple sites
- Desktop screen capture and note taking
- Dynamic QC note capture
- Quality management with decision tree based QC
- Advance QC reporting
- Unlimited expansion
- Third-party data integration tools
- Advanced user management and archiving
- Alert remote monitoring

CallCabinet Alert

At CallCabinet, we pride ourselves not only on having one of the most skilled and professional support staff in the industry, but also having developed powerful tools that enable our support teams to proactively support our clients by detecting and repairing any issues before they become problems. CallCabinet Alert is a next-generation customer support tool. It allows our support teams to remotely monitor and proactively support our clients Carbon installation, 24/7/365.

Benefits of CallCabinet Alert

70% of call recording systems are accessed only when the need arises. That is usually the time when companies discover that the call recording system was down at the precise time the crucial call was made. Inability to recover the recording could cost thousands, if not millions, of dollars.

At CallCabinet, we considered incorporating a system that would send out alerts in the event of a system failure. But we rejected this because:

- Who would monitor and react to the alerts.
- Would they be lost in the flood of daily alerts generated by all IT systems?
- What if the call recording server was down and no alerts could be sent?

So we came up with a revolutionary alternative: CallCabinet Alert

How it works

Using the latest communication technologies, CallCabinet Alert reports back to our regional support servers on a regular basis with details about your CallCabinet Carbon installation. We monitor a multitude of variables ensuring that your system is operating as it should at all times.

Lowest Total Cost of Ownership

CallCabinet Corporation strives to develop cost effective industrial strength applications with the lowest total cost of ownership in the industry. We understand the importance of implementing solutions that are not only affordable at the time of acquisition, but in the future as well.

CallCabinet Alert Feature

Our unique CallCabinet Alert feature contributes to the low total cost of ownership of our systems by reducing the costs associated with expensive IT personnel and support contracts, and by remotely monitoring and proactively supporting all CallCabinet installations.

Integration

CallCabinet Carbon includes a number of the latest powerful integration tools, which allow our clients access to standard data from the CallCabinet Server, and client-specific search and reporting requests. Our basic integration tools include XML-RPC, SOAP XML Based Web services, WCF and client specific APIs.

Flexible Licensing

CallCabinet Corporation offers a variety of ways to license your CallCabinet Carbon solution. Whatever your budget, whatever your infrastructure and whatever your methodology – it is important that your licensing option fits your corporate environment and budget. CallCabinet offers per extension/agent licensing, per port/channel licensing and complete site licensing models.

Latest Technologies

CallCabinet Corporation utilises the latest HTML5 web based technologies. This gives CallCabinet the ability to bring unrivalled features and broader controls into our web-based interfaces providing a superior and more productive user experience.

CallCabinet offers the following three editions of its call recording and quality managementsolutions:

EXPRESS EDITION

- ✓ Up to 60 channels
- ✓ 1 supervisor license
- ✓ CallCabinet Alert included

PROFESSIONAL EDITION

- ✓ Unlimited channels
- ✓ 2 supervisor licenses and
- ✓ CallCabinet Alert included

ENTERPRISE EDITION

- ✓ Unlimited Channels
- ✓ Unlimited supervisor licenses,
- ✓ CallCabinet included
