WHAT CAN YOU EXPECT FROM ATMOS FOUNDATION

Atmos Foundation has been developed by CallCabinet Corporation, market leaders in providing enterprise voice logging and call recording solutions. Our wealth of knowledge and superior expertise has enabled us to provide you with a cost effective, COMPLIANT and secure premise-based call recording solution.

Whether you have one location with five extensions or a nationwide infrastructure with multiple branches and process millions of calls, our compliant call logger is the solution for you!

All calls are 100% compliant and are individually secured and encrypted at source, with a rotating encryption methodology that is unique and specific to each individual call. Calls can be recorded with any brand of PBX, trunk or VoIP extension system.

All calls are stored on your Atmos hardware on site, and can be backed up to CallCabinet's cloud servers if required. Our logger also supports multiple time zones, multiple recording locations and the ability to search, sort and locate your calls within seconds.

Call us today to take advantage of on-premise enterprise-class call recording today.

We look forward to hearing for you!
